

Critical Thinking

Criteria	Grad Cert Fail	Grad Cert Pass MCMR Fail	Grad Cert Exceeds MCMR Pass	MCMR Exceeds
2(a) Identify elements of conflict or conflict management system	Misses important elements of the conflict / system.	Correctly identifies the main elements of the conflict / system (<i>e.g. parties, positions, interests, values, processes, decision making, etc.</i>)	Correctly identifies the majority of the elements of the conflict / system.	Correctly identifies all the elements of the conflict / system.
2(b) Select model/ theory of analysis	Uses inappropriate model / theory for the particular conflict / system.	Selects an appropriate model / theory for the particular conflict/ system;	Selects and explains choice of appropriate model / theory for the particular conflict system;	Selects and critically justifies choice of appropriate model/s theory/ies for the particular conflict / system.

2(c) Apply model/ theory of analysis	Incomplete analysis of the conflict / system; does not utilise the main elements of the conflict/ theory.	Produces an analysis of the conflict/ system that utilises the main elements of the model/theory	Produces an analysis of the conflict /system that utilises most of the relevant elements of the model / theory.	Produces a comprehensive analysis of the conflict /system that utilises most of the relevant elements of the model / theory or shows innovation in application.
2(d) Draw conclusions	Conclusions not logically linked to conflict / system / model / theory / analysis.	Draws logical conclusions from analysis.	Draws and explains logical conclusions from analysis (<i>e.g. draws clear links between analysis and conclusion</i>) .	Draws and critically justifies conclusions from analysis. (<i>e.g. includes reality testing/contingency acknowledgement</i>)
